

WHITEHAWK

LOA: 92' / 105'

Class/Type: Bruce King Custom Ketch

Builder: Lie-Neilsen

Designer: Bruce King

Launch Date: 1978

Skipper: Eric

One of Bruce King's finest designs, *WHITEHAWK* is a timeless clipper-bowed classic inspired by L. Francis Herreshoff's famous 1936 racing yacht *TICONDEROGA*.

The 105' ketch was built in 1978 in Rockland, Maine, and has recently received a complete

restoration to bristol fashion.

When it was built, the hull was the largest cold-molded wooden boat ever made using the West System Wood Epoxy Saturation Technique. Belowdecks features oversized staterooms and magnificent appointments, including a ten-sided Mandala skylight and a head with a teak bathtub.

The vessel currently sails in the waters of New England, with trips to Antigua and other ports in the Caribbean.
