

Video. About 3 minutes.

and the hulls get the same amount of lift as the foils. This is why the AC72 can sail so fast. The foils are designed to create lift, and the hulls are designed to create drag. The AC72 is a very fast catamaran, and it is a very interesting design. The AC72 is a very fast catamaran, and it is a very interesting design. The AC72 is a very fast catamaran, and it is a very interesting design.
